Let's Start!

Pronunciation Spot: Cash, credit or debit?

Learning Outcome

Describe detailed facts about events or actions in work and social contexts, in written or spoken situations

Ask your partner:

- When you have a problem with equipment, where do you go to get it fixed?
- When you pay for service, do you prefer to use cash, credit cards, or debit cards? Why?

Can Do Statements

- I can ask for and offer help with technical problems.
- I can say and use words like appreciate and recognize.
- I can use proper intonation with *either/or* questions.

Let's Explore!

Peter asks the technician to **have a look at*** his devices.

* "To have a look at" means to check something.

Instructions: Read the text aloud.

- Tech:** Hi there. How can I accommodate you today? Do you need sales or service?
- Peter:** Service please. I'm having problems with my laptop and my cell phone. I was wondering if you could check my devices.
- Tech:** Sure. Is your phone Android or iOS?
- Peter:** It's iOS. Could you please investigate the text message capability? I can't send text messages properly. People receive them days after I send them. I didn't even realize this was happening.
- Tech:** That's really unfortunate but I can troubleshoot that issue for you.
- Peter:** Also, there's something strange going on with my laptop. I had a file saved on my desktop and then it just disappeared into thin air. Do you think it was a computer virus, or a corrupt file or something else?
- Tech:** I'll run a diagnostic test for a virus. I could also check to see if the hard drive is corrupt. The efficiency of these tests is very good. I'll take them to the back to run the tests. I'll be back in a few minutes. What is the name of the lost file?
- Peter:** Proposal December 2015.
- Vanessa:** Well, she seems confident that she can help. I don't think you need to worry.
- Tech:** So, I ran the tests and they didn't recognize any corruption or infection with a virus. I found no problems at all. In fact, I found your file. On the desktop.
- Peter:** What? That's impossible. I swear it wasn't there and I searched everywhere.
- Tech:** Well, it's there now. Try sending me a text to 555-567-0987.
- Peter:** Okay. There you go.
- Tech:** I got it. Your phone is fine. Do you want to pay for the service with cash, credit or debit?
- Peter:** I can't believe it.
- Vanessa:** So it's not your devices, it's you!
- Peter:** I know what it is. Mercury's in retrograde!

Let's Practice!

Is the problem going to be fixed today or tomorrow?

Instructions: Draw a line to match the sentences in Column A and Column B. Read the complete sentences aloud. Check your pronunciation with your instructor.

COLUMN A

1. Do you need sales
2. Is your phone
3. Do you think it was a computer virus,
4. Do you think you could fix it for tomorrow
5. Do you want to pay for the service with cash,

COLUMN B

- a. or service?
- b. credit or debit?
- c. or a corrupt file or something else?
- d. or maybe for today?
- e. android or iOS?

Let's Practice!

Let's talk about technology!

Instructions: Proofread the sentence. Circle the incorrect word. Re-write the sentences correctly. Read the complete sentences aloud. Check your pronunciation with your instructor.

1) I was wondered if you could check my devices.

2) Did you investigated the text massage capability?

3) I'll run a diagnostic test for a virus.

5) I'll taking them to the back to run the tests.

6) I could also check to see if the hard driving is corrupt.

Extension Activity

Write a dialogue using either/or questions.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- With a partner, imagine that one of you has invited the other to your house for the first time.
- Write a dialogue between the host and the guest.
- Write either/or questions the host asks the guest and write the guests responses.
- Read the dialogue aloud in pairs using the correct intonation.
- Switch roles and read it aloud again.

Self-Assessment

Yes

No

I write a dialogue containing either/or questions.

☐ ☐

I read my dialogue aloud using the correct intonation.

☐ ☐

I read it again with my partner.

☐ ☐

Target Words

- device** (noun): an object or machine that has been invented to fulfill a particular purpose
e.g. I was wondering if you could check my devices.
- corrupt** (adjective): damaged or changed in negative way
e.g. I could also check to see if the hard drive is corrupt.
- computer virus** (noun): a hidden set of instructions in a computer program that is intended to cause problems
e.g. Do you think it was a computer virus, or a corrupt file or something else?
- diagnostic** (adjective): test to identify problems
e.g. I'll run a diagnostic test for a virus.
- to run a test** (expression): to administer a test
e.g. I'll take them to the back to run the tests.
- capability** (noun): the ability or power to do something
e.g. Could you please investigate the text message capability?

Learning Points

Stress with Suffixes: Two Syllables Before the Suffix

Sometimes, stressed syllables based on suffixes appear to not follow any pattern at all. But, when you look at words in reverse, from the end of the word toward the front, a pattern emerges.

These patterns can help you become familiar with how certain words are pronounced.

Stress patterns can only be found when it is understood that syllables must be counted from the end of the word toward the beginning of the word.

Let's look at the words *accommodate*, *investigate* and *unfortunate*. They all end in the suffix *-ate*. When you read them aloud, they do not necessarily follow a pattern. But, try looking at them in reverse. You will notice a pattern.

Three syllables before the suffix	Two syllables before the suffix	One syllable before the suffix	Suffix
ac	com	mo	date
in	ves	ti	gate
un	for	tu	nate

The pattern with these kinds of words is that they are stressed on the second syllable back from the suffix.

Other suffixes which follow this rule are:

-ate
-acy
-ize
-tion

For example:

accommodate
investigate
realize
unfortunate
efficiency
recognize

Try reading these sentences from the text. Focus on saying the words with these suffixes correctly:

Learning Points

Examples:

- How can I **accommodate** you today?
- Could you please **investigate** the text message capability?
- I didn't even **realize** this was happening.
- That's really **unfortunate** but I can troubleshoot that issue for you.
- The **efficiency** of these tests is very good.
- I ran the tests and they didn't **recognize** any corruption or infection with a virus.

Intonation with *Either/ Or* Questions

Intonation is an important aspect of pronunciation. It is the rise and fall (the melody) of your voice. Depending on what you want to communicate, you need to choose the proper intonation.

Either/or questions try to get the listener to select one of two options rather than giving a simple yes or no answer.

Either/or questions are used as information questions (the listener should give an answer containing information and not just a yes or no response). This is why *either/or* questions end with a falling intonation.

For example:

Do you want soup ↗ or salad ↘?

Questions with more than two options follow the intonation pattern typical of when you list a number of items.

For example:

Do you want soup ↗, salad ↗ or bread ↘?

Practice saying these examples from the text:

Examples:

- Do you need sales or service?
- Is your phone Android or iOS?
- Do you think it was a computer virus, or a corrupt file or something else?
- Do you want to pay for the service with cash, credit or debit?
